Quick Takes

THE ANNUAL SURVEY of Social Work Programs (Annual Survey) is a census of social work programs in the United States and its territories conducted by the Council on Social Work Education (CSWE) since 1952. Data collected in the Annual Survey are the primary source of information about social work students and graduates.

Baccalaureate Programs in Social Work Highlights

- The majority of baccalaureate students were enrolled full-time in 2018. For the 463 baccalaureate programs responding to this question, **86.7% of the 58,733 enrolled baccalaureate students were full-time.** Baccalaureate programs had average enrollments of 127 students.
- Over the last 10 years, **total enrollment in baccalaureate programs has increased by 14.2% at institutions reporting data in both 2008 and 2018; however, enrollment declined by 5.3% in the last year and 1.4% over the last 5 years.** Enrollment of students taking courses part-time increased dramatically over the 5-year and 10-year periods, jumping up 9.7% and 20.7%, respectively. During the same periods, the number of accredited baccalaureate programs increased 1.0% over the last year, 6.7% over the last 5 years, and 12.5% over the last 10 years.
- Baccalaureate degrees were conferred on 20,133 students at the 486 baccalaureate programs that responded, an average of 41 per program. Degree conferrals outpaced enrollment over the periods studied, **with a 22.4% increase over the last 10 years, 15.6% increase over the last 5 years, and a 0.4% decrease over the last year.**

Master's Programs in Social Work Highlights

- **More than a third of master's students were enrolled part-time in 2018.** Of the 240 master's programs responding to this question, 64.5% of the 67,084 enrolled master's students were full-time. Master's programs had average enrollments of 280 students.

- Master's enrollment and the number of master's programs has increased annually over the last 10 years, with **enrollment increasing 2.7% over the last year, 16.6% over the last 5 years, and 37.8% over the last 10 years.** During the same periods, the number of accredited master's programs increased at a slightly faster pace, 6.3% over the last year, 19.3% over the last 5 years, and 43.2% over the last 10 years.
- Master's degrees were conferred on 27,296 students at the 246 master's programs that responded, an average of 111 per program. **Degree conferrals increased at a pace consistent with enrollment over the periods studied,** with a 34.8% increase over the last 10 years; a 22.3% increase over the last 5 years, in line with the large increase in enrollment that occurred between 2008 and 2013; and a 1.6% increase over the last year.

Practice Doctorate Programs in Social Work Highlights

- **Almost half of all enrolled practice doctorate students are enrolled part-time.** Of the 10 practice doctorate programs responding to this question, 55.1% of the 1,487 enrolled practice doctorate students were full-time, with 81.7% of all students actively taking coursework. Practice doctorate programs had average enrollments of 149 students.
- Enrollment in practice doctorate programs and the number of institutions offering practice doctorate programs continues to increase dramatically, year-over-year. Since 2015, the first year for which a large enough number of respondents exists, **enrollment has increased annually by 34.4% from 2017 to 2018, 50.3% from 2016 to 2017, and 67.2% from 2015 to 2016, whereas the number of programs has increased annually by 37.5%, 9.1%, and 41.7%, respectively.**
- Practice doctorate degrees were conferred on 119 students at the 13 practice doctorate programs that responded, an average of nine graduates per program. **Degree conferrals had remained relatively flat from 2015 to 2017 but increased by 47.8% from 2017 to 2018.**

- **Practice doctorate graduates are primarily going into nonacademic administrative positions (22.9% of graduates) and private clinical practice (17.7%);** however, tenure-track faculty positions at CSWE-accredited programs (15.6%) and nontenure-track faculty positions at CSWE-accredited programs (12.5%) are also first destinations.

Doctoral Programs in Social Work Highlights

- **More than three-quarters of all PhD students are enrolled full-time.** Of the 63 PhD programs responding to this question, 78.2% of the 1,918 PhD students were full-time, with 52.3% of all students actively taking coursework. PhD programs had average enrollments of 30 students.
- **PhD enrollment increased from 2017 to 2018; however, enrollment declined for the rest of the 10-year period examined.** Enrollment was up 6.8% between 2017 and 2018 but dropped 18.7% both between 2013 and 2018 and between 2008 and 2018, with the largest drop (12.0%) occurring between 2014 and 2015. Over the same time period, the number of PhD programs has increased by 2.6%, 8.2%, and 12.9% over the last year, 5-years, and 10-years, respectively.
- PhD degrees were conferred on 303 students at the 66 PhD programs that responded, an average of five graduates per program. **Degree conferrals increased by 6.1% from 2017 to 2018 but have dropped by 2.5% since 2013 and by 9.5% since 2008.**

- **PhD graduates are primarily going into tenure-track faculty positions at CSWE-accredited programs (34.4% of graduates), nontenure-track faculty positions at CSWE-accredited institutions (13.2%),** nonacademic administrative positions (10.0%), academic administrative positions (8.6%), and postdoctoral fellowships (8.0%).

Additional Highlights

- The prevalence of online education varies greatly between degrees. **Among practice doctorate programs, 75.0% offer at least part of the program online (41.7% entirely online) and 49.7% of master's programs offer at least part of the program online (22.4% entirely online).** In contrast, only 29.9% of baccalaureate programs offer at least some courses online (6.0% entirely online), and 15.7% of PhD programs have some online courses (3.2% entirely online).
- **By Carnegie Classification, Large Master's Colleges and Universities enroll the highest percentage of social work students (30.0%) and confer the highest percentage of social work degrees (31.7%).** Doctoral Universities with very high research activity enroll (24.5%) and confer (27.0%) the second highest percentages of social work students and degrees, respectively.
- **U.S. Department of Education recognized Minority Serving Institutions enroll 24.5% of all students, whereas 26.2% of all degrees are conferred at Minority Serving Institutions.**

Introduction

THE ANNUAL SURVEY of Social Work Programs (Annual Survey) is a census of social work programs in the United States and its territories conducted by the Council on Social Work Education (CSWE) since 1952. Data collected in the Annual Survey are the primary source of information about social work students and graduates. In addition to advancing knowledge about social work education, the data are used to determine program membership dues for accredited baccalaureate and master's programs.

Background

The 2018 Annual Survey comprised five survey sections that gathered data on baccalaureate programs, master's programs, practice doctoral programs (e.g., DSW), PhD programs, and the data products members need from CSWE to best perform their jobs; data from this final special section will be used only internally by CSWE and the Commission on Research. The program sections included items on program structure and offerings, enrollments, and degrees awarded. The 2018 survey was an abbreviated version of the survey administered in previous years and did not collect data on applications, first-time enrollment, or demographic information for enrolled students or graduates.

A new addition to the 2018 report is a trend analysis of enrollment and degrees conferred, by degree level, for periods of 1, 5, and 10 years. Trend data was calculated by comparing enrollment and degree conferral rates for programs that submitted data in both years of the comparison (i.e. submitted data in both 2017 and 2018 for the 1-year comparison)—data for

TABLE 1. 2018 ANNUAL SURVEY RESPONSE RATE BY SURVEY SECTION

	Invitations	Completed Responses	% Responding
Baccalaureate	523	486	92.9%
Master's	272	246	90.4%
Practice Doctoral (DSW)	17	13	76.5%
Doctoral (PhD)	79	64	81.0%

institutions that submitted data in only one of the years was excluded from the trend calculation. The trend calculation shows the percentage change in the category between the two identified years.

The survey was administered online through the Qualtrics survey platform. Invitations to the survey were sent to all CSWE-accredited social work programs and to doctoral social work programs housed at institutions with CSWE-accredited social work programs via e-mail on May 6, 2019. Data collection closed in July 2019. Response rates are found in Table 1. A full list of responding institutions can be found in Appendix A.

A copy of the complete survey instrument is available on the CSWE website (www.cswe.org/Research-Statistics/Annual-Program-Study). Address questions about this report or the Annual Survey to research@cswe.org.

Respondents to the survey are required to respond to only a small percentage of items, most notably the number of degrees conferred, resulting in varied response rates per question. The data compiled in this report are based on self-reported data from the responding programs and institutions.
